

**Peter Coombs**

**Lead Investigator - Investigations and Risk Management**

Peter has over 40 years of national & international experience in criminal investigations, intelligence, security operations and risk management. He has a proven ability to identify, implement and maintain critical site vulnerability assessments and stakeholder relationships throughout government networks in support of corporate outcomes.

He has extensive long-term working experience within the mining sector throughout Australia, Africa, the Middle East and Papua New Guinea, spanning over 14 years. This includes many high-level investigations and security risk assessments, whilst developing strong structures and working relationships with foreign governments, law enforcement, intelligence services, community leaders and NCO's whilst developing human rights programs, critical incident management plans, use-of-force procedures, travel security programs and security intelligence programs.

Peter was the founder of the International Review Team, an Australian registered company providing extensive investigative, risk management, mine security and training to International clients along with protecting the company's people, assets, and integrity. These services include;

- Government Agencies and Law Enforcements - Developing strong working relationships including day to day Policing, national intelligence, immigration, community leaders and community relations.
- Security Intelligence - Baseline threat and vulnerability assessments, develop security intelligence programs and systems, training of security personnel in basic source management and operations skills.
- Security Operations - Develop use of force procedures, implement support for human rights and voluntary principles on multiple programs, baseline line security operations and risk assessments and security operations audits.
- Investigations - Conduct of scoped investigations, fraud risk assessments and awareness training.
- Risk Management - Support site planning, preparation and response to high impact local events, baseline risk assessments, development of appropriate site critical incident management plans and training.
